

Solvent Inkjet Printers

***At last....expand what is possible
with your current and future solvent inkjet printers.***

Introducing KromaPlex[™] solvent inkjet printable polycarbonate films! KromaPlex[™] films feature a precision surface treatment for high performance solvent inkjet printing.

For the first time high quality polycarbonate films, including hardcoated films, can be reliably printed with your solvent, light solvent, or eco solvent printer. Open new possibilities for your solvent inkjet printing business. Open new market possibilities for your business. KromaPlex[™] films eliminate the problems associated with the solvent inkjet printing of untreated films.

All KromaPlex[™] films will outperform untreated films in the critical areas of :

- > **Fast drying surfaces**
- > **Reliable color reproduction**
- > **Precise dot gain**
- > **Compatibility with solvent, light solvent, and eco solvent inks**
- > **Compatibility with backers, mounting systems, and spacer adhesives**
- > **Long term durability**
- > **No shelf life limitations before or after printing**
- > **Available interleaf system designed specifically for KromaPlex[™]**
