 One-sided lamination may cause curl.

Compatibility Chart For printer compatibility tables and to find out what printers this product works best with, go to www.oceusa.com and download the latest version Océ compatibility chart.

Océ PhotoPerfect Plus Photo Paper - PMPLUS7 Matte

Excellent adhesive glossy Photo paper for full color ink jet applications

Outdoor Suitability	This material was not designed for outdoor applications. However, it may be used for outdoor signage if printed with pigmented inks and laminated (encapsulated on all sides and edges).
Processing Tips	Printed side is the outer side of the roll. Use of gloves when handling is recommended. Print in a dust and dirt free environment (60-85°F, and 30-70% relative humidity).
Application Tips	This information is presented as a general guide only and is not a performance guarantee. Test first! This product will provide acceptable print image quality and dry times when used with the recommended OEM ink sets as noted in the Printer Compatibility chart on Océ website listed below. The user should independently determine, prior to use, the suitability of the material for the specific purpose. Recommended minimum surface application temperature for these products is 40°F.
User Tips	In order to prevent problems with cartridges, preventive maintenance by the customer on a daily basis is essential. Prior to starting your print job make a prime test plot. If all nozzles are not open, redo this test or make a "color test" print. Keep cartridges and their environment as clean as possible. Clean the service station assembly with water on a regular basis (preferably each day). Keep electrical contacts, flex cables and carrier clean from ink. Switch on the Auto Wipe mode. Be sure that the ink system is "closed"; there should be no air in the ink tubing system. Refill cartridges correctly (refer to the printer manual). Store cartridges correctly (use "print head garage"). For all Océ inks specific color profiles were developed to obtain maximum image quality.
Color Profiles	Color profiles are ink, media and machine specific.
Océ Display	Color profiles will improve image quality.
Graphics Printers	All printer profiles are available from website http://www.oceusa.com/resourcecenter

Performance on major Display Graphics Media

For performance of these inks on the various Océ Media please refer to the Product information Sheets of the media.
